A baby chick

Question:
Frogspawn is found in ponds around springtime, what does it turn into that begins with a 'T'?

Answer:
Tadpoles

Question:
What do you do to a plant to help it grow?

Answer:
Water it

There are several ways this game can be played - in the garden, park, local farm or even in the house if it rains, and very little planning is needed:

- Choose a trail with stopping points and, at the first point, ask the children the first question and hide the answer and an Easter treat nearby. Move on to the next point and question once they have found the answer.
- Hide both the question and answer, ask the children to find them, and then ask them to match the correct question with the answer. Each correct match gets an Easter treat.

Ideas for Easter treats to hide: Small foil wrapped Easter eggs, small packets of Easter sweets, small traditional Easter toys such as yellow chicks and other Easter related things they could do later in the day such as crafts, colouring pens and book.

This game is recommended for children aged 3+
