

ZOMBIE ESCAPE ROOM

THE ANTIDOTE QUEST

You and your friends are the last hope for humanity. A scientist left clues to the ingredients needed for an antidote to stop the zombie infection, but the lab is now overrun with the undead. Solve the puzzles to gather the ingredients, mix them, and save the world before it's too late!

Test Subject Notes

Research is suggesting that crystallized substances could be the key to helping neutralize the zombie infection. Tests to follow....

test .01

test subject seemed to enjoy crystallized honey

test .02
saw no difference in test subject when exposed to crysalized ginger

test .03
test subject seems to not respond well to crystallized salt will need to examine further

If you are reading this letter it means I didn't survive. I am the last living of all the scientist in this laboratory.

This is very important....

At the time of me writing this letter I am very close to figuring out the antidote. Unfortunately one of my colleagues was working on one portion of the antidote and I am afraid he was infected before he was able to tell me his findings. I will have to leave my secure room in order to navigate through the building and backtrack through his work in the different locations in order to figure out what his conclusion was.

This is what you must do now....

Locate the blueprint for the building and the compass. You will need to navigate through the building with your compass in hand. This is the only way you will be able figure out which ingredient is a viable option for the antidote.

Good Luck!

Cut each circle out around the borders

Cut each piece out around the outer edges

Our latest scientific research has forced us to investigate theories that the secret to creating a viable antidote might lie in using ingredients that are not necessarily easy to access or commonly known.

For instance we have started experimentation on ingredients that have once been used as ancient cures and remedies.

In addition we are also experimenting with ingredients said to have mystical powers and also ingredients of holy sources.

We have even uncovered very promising data on ingredients that have been used for healing and protection in folklore.

Below you will find our rating from 1-10. 10 being a highly promising ingredient for the final recipe of the antidote.

We will report back as soon as we have collected more data and results.

Ingredient	Chromatic Color	Rating
Mandrake Root		10
Vampire Vine Extract		3
Dragon's Blood Resin		1
Sacred Water		9
Sacred Olive Oil		2
Balm of Gilead		8
Sage		5

A green cartoon character with a large head, wearing a green shirt with a red collar and yellow stitches, and white pants. The character is holding a white rectangular sign with black text. The background is a bright green, textured surface with green liquid dripping down the sides.
